

Jarvis AI - Commands Cheat Sheet

Speak naturally or type any of these commands in your phone browser. Jarvis understands English, Hindi, and Hinglish.

Volume and Audio

Command	What Happens
<code>Set volume to 60</code>	Sets your PC volume to 60%
<code>Mute / Unmute</code>	Toggles mute on PC speakers
<code>Volume up / Volume down</code>	Nudges volume by 10%
<code>Stop talking</code>	Stops Jarvis mid-speech instantly

App and Window Control

Command	What Happens
<code>Open Chrome / Open Notepad</code>	Launches the application
<code>Open YouTube</code>	Opens YouTube in your default browser
<code>Find the file project.pdf</code>	Locates and opens the file in Explorer
<code>Close Jarvis / Goodbye</code>	Shuts down the Jarvis server gracefully

AI and Cloud Commands

Command	What Happens
What is on my screen?	Takes a screenshot and Gemini analyses it
[Attach image] What is this?	Uploads your photo for visual analysis
Search the price of [item]	Live web search via DuckDuckGo
Write a Python script to...	Gemini generates and runs sandboxed code
Take a photo of me	Fires webcam (audible beep privacy alert)

Safe Mode

Toggle **Safe Mode** in the phone UI to strip all dangerous tools (terminal, file write) from Gemini's schema. The AI can still chat and search, but cannot touch your files or run scripts. Ideal for demos or when away from your PC.

Keyboard Shortcuts (Macro Commands)

Command	Shortcut Triggered
Take a screenshot	Win + Shift + S
Lock screen	Win + L
Task manager	Ctrl + Shift + Esc
Show desktop	Win + D
Copy / Paste	Ctrl + C / Ctrl + V

Language Support

Jarvis auto-detects your language. Responses prefixed with `[HI]` are spoken in a native Hindi voice (Devanagari Piper TTS). English responses use the `[EN]` prefix with an English voice.
